SUMMARY

Computer Science graduate with strong knowledge of Java, OOPs, SQL, and DBMS, with expertise in full-stack web development using the MERN stack. Skilled in designing and developing scalable backend systems, RESTful APIs, and database management using Node.js, Express.js, and MongoDB, while also proficient in data structures and algorithms (DSA) with Java. Passionate about building efficient, reliable, and high-performance software solutions to solve real-world problems.

EDUCATION

Lakshmi Narain College of Technology and Science

2021 – 2025

B.Tech - Computer Science and Engineering - CGPA - 7.53

Bhopal, Madhya Pradesh

PROJECTS

Hire-Hub(Job Seeking Application) | React.js, Express.js, Node.js, MongoDB, TailwindCSS

- A web application designed for job seekers to search and apply for jobs while allowing recruiters to post and manage job listings seamlessly.
- Implemented User registration, login, role-based authorization.
- Created dynamic job listing pages with search and filtering functionalities.
- Developed a feature for job seekers to track the status of their applications.
- Users can manage their profiles, including uploading resumes and portfolios

Password Guardian | React.js, Express.js, Node.js, MongoDB

- Developed a full-stack web application using the MERN stack to allow users to check if their passwords have been compromised in known data breaches.
- Integrated APIs to breach databases for real-time password security verification.
- Built a user-friendly interface with React.js, enabling easy and intuitive password checking.
- Optimized backend performance using Node.js, Express.js, and MongoDB for scalability and reliability.

GPTBlogger | React.js, Node.js, MongoDB, Express.js, REST APIs

- Built responsive blogging platform with JWT authentication and dashboard using React Router and Tailwind CSS
- Integrated AI APIs for title generation, grammar checking, and plagiarism detection using Axios
- Implemented Quill.js editor with image upload functionality and AI-generated content features
- Developed content originality checking using plagiarism APIs with uniqueness percentage scoring
- Achieved 90+ Lighthouse score through code splitting and lazy loading techniques

TECHNICAL SKILLS

Languages: Java , JavaScript, SQL

Technologies/Frameworks: React.js, Node.js, Express.js, REST APIs, JWT, MongoDB

Web Technologies: HTML5, CSS3, Tailwind CSS

Tools: VS Code, Eclipse, Git, GitHub, Postman, Thunder Client

CODING PLATFORMS

- Solved **300+** problems on GeeksforGeeks
- Solved **100+** problems on LeetCode

CERTIFICATIONS

- Learn React – Coursera
- JavaScript Algorithms and Data Structures – freeCodeCamp
